Claim Amendments

This listing of the claims will replace all prior versions, and listings, of claims in the application:

1 (withdrawn-currently amended). A method of practicing nasal hygiene comprising the steps of applying to a person's nostril a non-irritating hygienic composition consisting essentially of the product of compounding under homogenizing conditions water, ~~0.01% to 5% by weight, as chlorine dioxide, of a source of chlorine dioxide,~~ an amount of a source of chlorine dioxide sufficient to generate or provide 0.01% to 5% by weight of chlorine dioxide, 0.01 to 3% by weight of at least one olfactory stimulant; 0 to 5% by weight of at least one fixative compound less volatile than the olfactory stimulant; 0.1 to 2.5% by weight of at least one inorganic salt selected from the group consisting of alkali metal chloride, alkali metal bicarbonate, and alkali metal chlorate; and 0.0002 to 0.006 % (as aluminum) by weight of at least one water soluble aluminum compound , provided that the total concentration of said at least one inorganic salt is in the range from 0.6% by weight to 2.5% by weight,

holding the composition within the nostril for a hygienic holding period,

and discharging the composition from the treated nostril.

2 (withdrawn-currently amended). The method of claim 1, wherein the ~~quantity~~ quantity of the hygienic composition applied to a nostril is in the range of 0.3 milliliters to 3 milliliters.

3 (withdrawn-currently amended). The method of claim 1, wherein the holding period is in the range from ten seconds ~~teten~~ to ten minutes.

4 (currently amended). A non-irritating hygienic composition consisting essentially of the product of compounding under homogenizing conditions

water;

~~0.01% to 5% by weight, as chlorine dioxide, of a source of chlorine dioxide,~~ an amount of a source of chlorine dioxide sufficient to generate or provide 0.01% to 5% by weight of chlorine dioxide, 0.01 to 3% by weight of at least one olfactory stimulant, 0 to 5% by weight of at least one fixative compound less volatile than the olfactory stimulant, 0.1 to 2.5% by weight of at least one inorganic salt selected from the group consisting of alkali metal chloride, alkali metal bicarbonate, and alkali metal chlorate; and

0.0002 to 0.006 % (as aluminum) by weight of at least one water soluble aluminum compound, provided that the total concentration of said at least one inorganic salt is in the range from 0.6% by weight to 2.5% by weight.

5 (original). The hygienic composition of claim 4 having a pH in the range from 6 to 9.

6 (currently amended). The hygienic composition of claim 4, wherein the concentration of chlorine dioxide source, ~~as chlorine dioxide, is in the range of 0.1% to 2% by weight~~ is sufficient to generate or provide 0.1% to 2% by weight of chlorine dioxide.

7 (currently amended): The hygienic composition of claim 4[[.]] wherein the concentration of olfactory stimulant is in the range of 0.05 to 1% by weight.

8 (original). The hygienic composition of claim 4, wherein at least two inorganic salts are present.

9. (cancelled).

10 (original). The hygienic composition of claim 4, wherein the concentration of water soluble aluminum compound is in the range of 0.0005% to 0.005% by weight.

11 (currently amended). The hygienic composition of claim 4, wherein the source of chlorine dioxide ~~comprises~~ is an alkali metal chlorite.

12 (original). The hygienic composition of claim 4, wherein the source of chlorine dioxide is a combination of alkali metal chlorite and chlorine dioxide.

13 (original). The hygienic composition of claim 4, wherein the olfactory stimulant is selected from the group consisting of cycloaliphatic alcohols, cycloaliphatic ketones, non-phenolic aromatic hydroxyl compounds, phenols having at least nine carbon atoms, volatile oils derived from plant materials, and mixtures thereof.

14 (original). The hygienic composition of claim 4, including 0.05% to 1% by weight of a fixative compound selected from the group consisting of oil of sweet birch, oil of spearmint, oil of pine, and mixtures thereof.

15 (original). The hygienic composition of claim 4, wherein the water soluble aluminum compound is potassium aluminum sulfate.

16 (currently amended). The hygienic composition of claim 4, wherein ~~the~~ said at least one inorganic salt is sodium bicarbonate.

17 (currently amended). The hygienic composition of claim 4, wherein ~~the~~ said at least one inorganic salt is potassium chlorate.

18 (currently amended). The hygienic composition of claim 4, additionally ~~comprising~~ containing an amount not exceeding 0.5% by weight of an adjuvant selected from the group consisting of colorants, surfactants, and chelating agents.

19 (original). The hygienic composition of claim 4, wherein chlorine dioxide can be detected.

20 (original). The hygienic composition of claim 4, wherein chlorine dioxide cannot be detected.

21 (new). The method of claim 1, wherein said source of chlorine dioxide is chlorine dioxide.
